OBJECTIVE

I am a human-centered UX Designer who is motivated to solve unique problems. I aim to contribute to innovative projects and to use design thinking to create better experiences for users.

EXPERIENCE

Design Research Assistant November 2021 - Present

Bruyère Research Institute

Working with a team of design researchers to improve infection prevention and control in long term care homes. Transcribed interviews and collected data user research from several long term care facilities across Ontario.

UX Designer September 2021 - Present

Transport Canada, Power Apps Center of Excellence

Designing wireframes and working with developers to make digital government services more user-friendly. Reviewing existing apps and interfaces to improve usability and accessibility.

UX Designer May 2021 - September 2021

Transport Canada, Center of Expertise for Human Centered Design

Lead on internal website redesign project, writing HTML and CSS, reviewing colleagues' work, working with colleagues to promote Human-Centered Design throughout Transport Canada

Design Research Assistant October 2020 - May 2021

Carleton University

Assisting with project to redesign, retrofit, and prepare university classrooms for in-person teaching post-COVID-19. Performed primary & secondary research including floor plan explorations and interviews with stakeholders

Design Intern January - August 2020

Tungsten Collaborative

UX design consulting, web heuristic analysis & redesign, trade show booth design, product design consulting

UX Design Co-op September 2019 - December 2019

Nokia

Completed preliminary research and early design ideation for dark mode across internal Nokia software, redesigned internal web apps using Sketch App, maintained & updated asset library
